The International Society for Tropical Ecology was founded in 1956 in India, with the aim of promoting studies in all fields of ecology related to tropics and subtropics. The Society regularly publishes the journal TROPICAL ECOLOGY (since 1960), and organizes symposia on topics of current ecological interest in tropics. Till date ten symposia have been organized in different countries.

The Society has been registered in India (Registration No. 1266) by the Registrar of Societies, Uttar Pradesh, Varanasi.

The Library of the Society, developed through exchange and gratis publications, is housed at the Department of Botany, Banaras Hindu University, Varanasi 221005, India. All such publications may be sent to the Librarian.

Librarian Dr. Nandita Ghoshal, Department of Botany, Banaras Hindu University, Varanasi 221005, India.

INTERNATIONAL SOCIETY FOR TROPICAL ECOLOGY

Subscription rates

With effect from January 1, 2008

Membership of the Society is open to persons of all Nations, who are interested in ecology. The annual membership subscription is Rs. 500 for Residents in India and SAARC countries, U.S.\$ 30 for Residents in other developing countries and U.S.\$ 60 for Residents in developed countries. New members pay an admission fee of Rs. 50 or U.S.\$ 3, as applicable. Members are entitled to receive TROPICAL ECOLOGY *en gratis*, to attend symposia and meetings, to vote in the election of the Executive Committee and be eligible for election to the Executive Committee. Details of membership and application form can be obtained from the web site www.tropecol.com.

The Institutions can subscribe TROPICAL ECOLOGY at the post-free annual rate of Rs. 1200 (India) or U.S.\$ 140 (Overseas). Subscription agents are allowed 20% discount.

Printed at: THE LUCKNOW PUBLISHING HOUSE, LUCKNOW, INDIA

The journal covers various aspects of tropical ecology. The study examines the year wise distribution, authorship pattern, degree of a Cite.Â A team of ecologists, computer scientists, and engineers from Conservation International (CI) and San Diego Supercomputer Center at the University of California San Diego (SDSC, UCSD) has been collaborating over the past 3 years to develop cyberinfrastructure for the TEAM (Tropical Ecology, Assessment and Monitoring) Network of tropical forest fiel Journal of Tropical Ecology aims to address topics of general relevance and significance to tropical ecology. This includes sub-disciplines of ecology, such as conservation biology, evolutionary ecology, marine ecology, microbial ecology, molecular ecology, quantitative ecology, etc. Studies in the field the field of tropical medicine, specifically where it involves ecological surroundings (e.g. zoonotic or vector-borne disease ecology), are also suitable. Tropical Ecology is devoted to all aspects of fundamental and applied ecological research in tropical and sub-tropical ecosystems. Nevertheless, the cutting-edge research in new ecological concepts, methodology and reviews on contemporary themes, not necessarily confined to tropics and sub-tropics, may also be considered for publication at the discretion of the Editor-in-Chief.
