This presentation is based on information contained in the book Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods and Seeds of Deception, both by Jeffrey Smith. Full citations for the studies presented are found in Genetic Roulette. Date uploaded. Nov 05, 2008.Â Description: This presentation is based on information contained in the book Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods and Seeds of Deception, both by Jeffrey Smith. Full citations for the studies presented are found in Genetic Roulette. Copyright: Attribution Non-Commercial (BY-NC). Eating GMO foods has risks, lots of them. Smith includes 65 health dangers. These link GMOs in our food to toxic, allergic reactions, and infertility.Â The material in Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods helps inform us on what the future may hold, and how best to feed our next generations. Read more. 4 people found this helpful. This article discusses the potential health risks of genetically engineered foods (GMOs). It draws on some previously used material because its importance bears repeating. It also cites three notable books and highlights one in particular - Jeffrey Smith's "Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods." Detailed information from the book is featured below. Genetically engineered foods saturate our diet today. In the US alone, over 80% of all processed foods contain them. Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods. International bestselling author and independent filmmaker Jeffrey M. Smith is the leading spokesperson on the health dangers of Genetically Modified Organisms (GMOs). His meticulously researched books and films document how the worlds most powerful Ag biotech companies bluff and mislead safety officials and critics to put the health of society at risk. Former US National Institutes of Health scientist Candace Pert describes Jeffrey as "the leading world expert in the understanding and communication of the health is Provides information for an understanding of the health risks of GM food. This book presents nearly forty health risks of the foods that Americans eat every day. It explores why children are most at risk, false claims by biotech advocates, how industry research is rigged to avoid finding problems, the economic losses associated with it, and more. Year: 2006.Â ZAlerts allow you to be notified by email about the availability of new books according to your search query. This second book on the subject, Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods adds more information and fleshes out his argument for getting involved at grass roots level in our food production. It is a big book in terms of both its size and the technical info it offers the reader. Sure, its a technical book in parts, but it should be accessible to anyone who wants to grasp the biology of how we are trying to improve the natural cycle of foods we need to grow to live well. Eating GMO foods has risks, lots of them. Smith includes 65 health dangers. These link GM This presentation is based on information contained in the book Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods and Seeds of Deception, both by Jeffrey Smith. Full citations for the studies presented are found in Genetic Roulette. Date uploaded. Nov 05, 2008.Â Description: This presentation is based on information contained in the book Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods and Seeds of Deception, both by Jeffrey Smith. Full citations for the studies presented are found in Genetic Roulette. Copyright: Attribution Non-Commercial (BY-NC). The Genetic Roulette documentary by Jeffrey Smith reveals the health dangers of genetically engineered (GE) foods.Â The film expands on his second book, Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods. As a consumer advocate against GE foods, Smith's authority is unrivaled. His meticulous research has documented how biotech companies continue to mislead legislators and safety officials. The health of the environment in peril. Smith has made this information widely available via his Institute for Responsible Technology website, one of the most comprehensive sources of GE health information on the Internet. The biotech industry's claim that genetically modified (GM) foods are safe is shattered in this groundbreaking book (and film). It is presented in the clear, accessible style that made Jeffrey Smith's "Seeds of Deception" the world's best-selling book on genetically engineered foods. As the world's most complete reference on the health risks of GM foodsÂ As the world's most complete reference on the health risks of GM foods, Genetic Roulette is also ideal for schools and libraries.

Genetic Roulette reveals the science and risks of GMOs in the food chain. To get a copy of Genetic Roulette: The Gamble of Our Lives, just click here. Make a minimum donation of \$25 or more to receive a free DVD copy (loaded with bonus material) and support progressive documentaries and Truthout. Mark Karlin: Let's start with the basics. Jeffrey Smith: Genetically modified organisms, genetically engineered foods, transgenics – these all refer to the process of taking a gene or genes from one species and forcing it into the DNA of other species. You can mix and match between plant, animal, human, insect, bacteria and viruses, creating new organisms that were not part of the billions of years of evolution. What are genetically modified (GM) organisms and GM foods? Genetically modified organisms (GMOs) can be defined as organisms (i.e. plants, animals or microorganisms) in which the genetic material (DNA) has been altered in a way that does not occur naturally by mating and/or natural recombination. Gene transfer from GM foods to cells of the body or to bacteria in the gastrointestinal tract would cause concern if the transferred genetic material adversely affects human health. This would be particularly relevant if antibiotic resistance genes, used as markers when creating GMOs, were to be transferred. Codex developed principles for the human health risk analysis of GM foods in 2003. Principles for the risk analysis of foods derived from modern biotechnology. This presentation is based on information contained in the book Genetic Roulette: The Documented Health Risks of Genetically Engineered Foods and Seeds of Deception, both by Jeffrey Smith. Genetic Roulette tells you why you must avoid genetically engineered foods to stay healthy."--John H. Boyles, MD, ear, nose, and throat, and allergy specialist. "Jeffrey Smith is the leading world expert in the understanding and communication of the health issues surrounding genetically modified foods.Â Sixty-five health risks of the foods that Americans eat every day are presented in easy-to-read two-page spreads. The left page is designed for the quick scanning reader; it includes bullets, illustrations, and quotes. The right side offers fully referenced text, describing both research studies and theoretical risks. The second half of Genetic Roulette shows how safety assessments on GM crops are not competent to identify the health problems presented in the first half. Through genetic engineering, scientists can handpick and extract specific genes from organisms, bacteria, and viruses and inject them into other organisms. This process creates new species with an "improved" set of traits and a genetic code not found in nature. GMOs are all around us.Â There are certainly some pros of genetically modified foods and the use of genetic engineering. Here are a few: They save us money. Genetic Roulette tells you why you must avoid genetically engineered foods to stay healthy." - John H. Boyles, MD, ear, nose, and throat, and allergy specialist.Â International bestselling author of Seeds of Deception and Genetic Roulette , Jeffrey M. Smith is a widely popular spokesperson on the documented health risks of genetically modified organisms (GMOs) and how biotech companies rig research, gag critics, hijack regulators, and spin fantastic unfulfilled promises. His Institute for Responsible Technology's Campaign for Healthier Eating in America is designed to achieve the tipping point of consumer rejection of GMOs to force them out of the food supply.
