Concerning cross-cultural surveys, it goes without saying that social contexts for performance vary widely across cultures and time, as do the relative distribution and significance of instruments and instrumental performance. Making generalizations about gender and musical roles is therefore fraught with difficulties. Native perspectives, individual exceptions, and the complexities of everyday life tend to be glossed over or ignored in such generalizations, and they can often veer towards the glib. Yet, there is value in the cross-cultural survey, for certain patterns emerge from this perspec... Gender in cross-cultural perspective (5th ed.). Upper Saddle River, NJ: Prentice-Hall. While we in the west are still privileging the binary between men and women as a lense to look at the gender difference, many non "western cultures have developed a concept of third gender in order to accommodate the emerging political movements dealing with transgendered subjects. Gender is often related to development and invariably female members have been marginalized in relation to their male counterparts in government policie Cross-cultural gender differences. 323. Cross-cultural studies can provide crucial evidence on the relative importance of biological versus cultural factors in gender differences in personality traits. If they are in fact biologically based, the same differences ought to be seen in all cultures, so pancultural gender differences would provide evidence for a biological basis. Your Answer: According to our main source of Gender in Cross Cultural Perspective the book along with lecture gave us many examples of barriers and preconditioned notions of man's work or woman's work and how these barriers and outlines have been broken and rewritten over the course of time and throughout the years. Women have been proven to have made tools as well as keep a home and family together. We saw examples of women who also did meat and animal gathering for the family. It was not solely left up to the man and his troops. It has also been founded that much of the art work and record k Gender, precarious work and social inequalities are the center of my academic interests. During my doctoral studies, I conducted year-long fieldwork research on agency-mediated temps or "dispatched workers" inside two Japanese business organisations. Dispatched and other insecure and In Japan, Confucianism-informed gender and family values are deeply embedded in the fabric of society. Key to these values are women's family role as "good wife, wise mother" (ryōsai kenbo) and men's breadwinner responsibilities as "a central supporting pillar" (daikokubashira) in the traditional household.
