

Friday's Footprint: How Society Shapes the Human Mind // 2001 // 9780195349078 // 204 pages // Leslie Brothers // Oxford University Press, 2001

Friday's footprint. What these fascinating cases have in common are the patients' inability to attach appropriate mental lives to the bodies around them. In the first example, the body of the husband was believed not to have the mind of the husband.Â Friday's footprint. patients with localized brain dysfunction. Such a patient might complain, as in the example at the beginning of the chapter, "There is a man living in my house who looks just like my husband, but I know he is not my husband." Buy usedÂ This book is confusing and incomplete. Besides, his seemingly main theme, that human mind is both a social product and creator of social behavior, is not a new perspective, either (e.g. Maturana's structural coupling theory). I don't think this book is suitable for picky readers. Read more. Friday's Footprint. How Society Shapes the Human Mind. Leslie Brothers. Friday's Footprint. How Society Shapes the Human Mind. Leslie Brothers.Â By broadening our approach to the brain, this groundbreaking book makes an important contribution to our understanding of the human mind. Show more. Friday's Footprint. How Society Shapes the Human Mind. Leslie Brothers.Â "In Friday's Footprint, Professor Brothers offers a breathtaking, sweeping account of how human brain structure and function, from the single neuron to mind and conscious awareness, have come to be shaped through the course of primate social evolution. She challenges us with the startling view that all we are, think, or feel, bears the indelible stamp of our long history as intensely social creatures. Find many great new & used options and get the best deals for Friday's Footprint: How Society Shapes the Human Mind by Leslie Brothers (Hardback, 1997) at the best online prices at eBay! Free delivery for many products!Â Dr Leslie Brothers reveals the brain as a social organ - adapted to respond to and process specific social stimuli that are unique to human evolution. Findings present a convincing argument: that it is not possible to understand the products of human evolution - whether language, consciousness, or emotion - in the absence of a social context.
