Special chapters take a more detailed look at specific challenges. Extensive statistical information is included OECD Economic surveys: poland " ISBN 92-64-02621-5 " © OECD 2006. Executive summary. Raise investment and growth by reducing regulation and improving conditions for entrepreneurs Sluggish investment and low innovation activity are related to Poland's high degree of regulation; this is due mainly to high public ownership, perceptions of an ambivalent attitude to foreign investment and a considerable burden of bureaucracy, though progress has been made in recent years. Without improvements in all these areas, measures to improve flows of finance and information to small companies and innovators
