

# Eight Days on Planet Earth / 9780062571755 / HarperCollins, 2017 / 2017 / 320 pages / Cat Jordan

Pre-publication book reviews and features keeping readers and industry influencers in the know since 1933. Current Issue Special Issues All Issues Manage Subscription Subscribe. Writers' Center. The ground is rumored to be the site of a past UFO crash, and Priya claims she is an alien who will soon be catching a ride back to her planet. Matty is doubtful, but that doesn't stop him from introducing Priya to all the wonders of Earth, including roller coasters, swimming, and, of course, sex. But he worries about Priya's severe headaches, which she chalks up to gravity sickness. It takes some time (readers who know that Priya is a fairly common Indian name will be way ahead of him), but finally Matty is forced to confront the truth about both Priya's situation and his feelings about his f For the first time, eight planets have been found orbiting another star, tying with our solar system for the most known planets around a single star. The Kepler-90 system is in the constellation Draco, more than 2,500 light-years from Earth. Hide Caption. The planet is found in the habitable zone of a star like our sun, approximately 2,700 light years from Earth in the constellation Cygnus. Hide Caption. You can write a book review and share your experiences. Other readers will always be interested in your opinion of the books you've read. Whether you've loved the book or not, if you give your honest and detailed thoughts then people will find new books that are right for them. 1. Samuel Johnson: The Complete English Poems (Penguin Classics).
