Visual literacy refers to an individual's ability to understand and evaluate information presented through images such as pictures, photographs, symbols, and videos. Visual literacy means going beyond simply looking at the image; it involves assessing the message the image is trying to convey or the feelings it is designed to evoke. Developing strong visual literacy involves teaching students to observe and analyze images. They should be trained to observe the image as a whole and note what they see. Reading literacy and media literacy have a lot in common. Reading starts with recognizing letters. Â Media literacy includes asking specific questions and backing up your opinions with examples. Following media-literacy steps allows you to learn for yourself what a given piece of media is, why it was made, and what you want to think about it. Teaching kids media literacy as a sit-down lesson is not very effective; it's better incorporated into everyday activities . For example: With little kids, you can discuss things they're familiar with but may not pay much attention to.
