Description:

Review If you want to learn why biotech corporations insist on spreading GMO seeds around the World you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist... --Marijan Jost, Professor of Genetics, Krizevci, Croatia

If you want to learn why biotech corporations insist on spreading GMO seeds around the World you should read this carefully researched book. You will learn how these corporations want to achieve control over all mankind, and why we must resist... --Marijan Jost, Professor of Genetics, Krizevci, Croatia

The book reads like a murder mystery of an incredible dimension, in which four giant Anglo-American agribusiness conglomerates have no hesitation to use GMO to gain control over our very means of subsistence... --Anton Moser, Professor of Biotechnology, Graz, Austria

What is so frightening about Engdahl's vision of the world is that it is so real. In this new age of

free markets, everything science, commerce, agriculture and even seeds have become weapons in the hands of a few global corporation barons and their political fellow travelers. --Dr. Arpad Pusztai, biochemist, formerly of the Rowett Research Institute, Scotland.

Engdahl's newest book is just out from the Centre for Research on Globalization. It's a sequel to his first one called "Seeds of Destruction: The Hidden Agenda of Genetic Manipulation" and subject of this review. It's the diabolical story of how Washington and four Anglo-American agribusiness giants plan world domination by patenting life forms to gain worldwide control of our food supply and why that prospect is chilling. Engdahl's book focuses brilliantly on one of them. To fully cover its vital contents, this review will be in three parts for more detail and to make it easily digestible. Part I of "Seeds of Destruction". In 2003, Jeffrey Smith's "Seeds of Deception" was published. Hidden agenda of dna genetic manipulation. Addeddate. 2016-10-05 20:30:08. Seeds of Destruction book. Read 25 reviews from the world's largest community for readers. This skillfully researched book focuses on the effort of a tin... He cogently reveals a diabolical world of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain control over food production worldwide. If it often reads as a crime story, that should be no surprise: that is what it is. Engdahl's carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. An eye-opener and must-read for all those committed to social justice and World peace. <http://globalresearch.ca/books/SoD.html>

And these seeds of destruction of carefully constructed regulatory framework- to protect the environment and human health- were sown back in the 1920s. Pause to think: a normal healthy person can at the most go without food for perhaps seven days but it takes a full season, say around four months, for a seed to grow into food crop. The "Green Revolution" was part of the Rockefeller agenda to destroy seed diversity and push oil and gas based agriculture inputs in which Rockefeller's had main interest. Destruction of seed diversity and dependence on proprietary hybrids was the first step in food control. (See my notes, Box 1). Seeds of Destruction book. William Engdahl, an American writer and journalist living in Germany. The book claims that the wealthy Rockefeller family is planning to take control of the world's agriculture and food supply through the Green Revolution and the promotion of genetically modified organisms which would lead to the elimination of independent farms.

And these seeds of destruction of carefully constructed regulatory framework- to protect the environment and human health- were sown back in the 1920s. Pause to think: a normal healthy person can at the most go without food for perhaps seven days but it takes a full season, say around four months, for a seed to grow into food crop. It is true that initially Green Revolution technologies led to spurt in farm productivity but at a huge cost of destruction of farmlands, bio-diversity, poisoned aquifers and progressively poor health of the people and was the true agenda of the proponents of Green Revolution. The real impetus came with the technological possibility of gene splicing and insertion of specific traits into unrelated species. Seeds of Destruction. The Hidden Agenda of Genetic Manipulation. Global Research. Seeds of Destruction. Yet, unlike their predecessors within leading circles of the British Empire, this emerging American elite, who proclaimed proudly at war's end the dawn of their American Century, were masterful in their use of the rhetoric of altruism and world-benefaction to advance their goals. Their American Century paraded as a softer empire, a "kinder, gentler" one in which, under the banner of colonial liberation, freedom, democracy and economic development, those elite circles built a network of power the likes of which the world had not seen since the time of Alexander the Great's Manipulation Dark Psychology to Manipulate and Control People. 74 Pages 2019 77,243 Downloads New!
