Curriculum vitae template, how to write a CV, job application, resume, academic qualifications, references. What is the purpose of a Curriculum vitae The aim of a CV is solely to get the applicant invited to a job interview and should be written with this in mind. It should not be viewed as a document on which to list your entire career history. Instead it should be a brief document that highlights only RELEVANT skills which are related to the job you are applying for. A typical curriculum vitae template layout: Personal profile: These should be at the beginning of your CV and are probably the first thing a hiring manager will see. Therefore they must quickly grab the readers attention and get them
