When tempted to predict a child will not complete the series of RR lessons successfully, this lowered expectation immediately _ detrimental effects. Do not suggest a child is unlikely to learn to deal with written code. You must KEEP TRYING! (p. 169). produces. Research shows that many children identified by other professionals (medical doctors, language specialists, etc...) as likely to have difficulties in literacy have __ the RR program. (p. 169-171). successfully completed. Retelling: An Evidence-Based Literacy Strategy. By Shannon Kelley, MAT. Understood's resources for educators are backed by research, vetted by experts, and reviewed by classroom teachers. Save. Save. Before the lesson, take a few minutes to read the text to help you choose which retelling activities to use for this particular text. Pre-reading can also help you figure out what background knowledge students need. As you pre-read, focus on the following This website provides information of a general nature and is designed for information and educational purposes only and does not constitute medical or legal advice. Understood is a nonprofit initiative. Understood does not and will not take money from pharmaceutical companies. Digital literacy is necessary to become digital citizens: individuals responsible for how they use technology to interact with the world around them. However, despite facing a fourth industrial revolution that is set to impact all industries and economies, UK education policy is currently failing to prepare pupils for a new breed of workplace. And a new world. What's more, there is a worrying rise in unhappy and anxious children emerging alongside the upward trend of childhood internet use. The truth is, while younger generations are being labelled as digital natives when it comes to safety, they are often no more literate than their parents. Digital platforms make children vulnerable to criminals and bullies, especially during a time of lockdown and social isolation. Visual literacy refers to an individual's ability to understand and evaluate information presented through images such as pictures, photographs, symbols, and videos. Visual literacy means going beyond simply looking at the image; it involves assessing the message the image is trying to convey or the feelings it is designed to evoke. Developing strong visual literacy involves teaching students to observe and analyze images. They should be trained to observe the image as a whole and note what they see. Reading literacy and media literacy have a lot in common. Reading starts with recognizing letters. Media literacy includes asking specific questions and backing up your opinions with examples. Following media-literacy steps allows you to learn for yourself what a given piece of media is, why it was made, and what you want to think about it. Teaching kids media literacy as a sit-down lesson is not very effective; it's better incorporated into everyday activities . For example: With little kids, you can discuss things they're familiar with but may not pay much attention to.
