Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of Earth's larger ecosystem, and by emphasizing the preservation of natural capital, the field of ecological economics is differentiated from environmental economics, which is the mainstream economic analysis of the environment. Read "Ecology, Economy Quest for a Socially Informed Connection" by Felix Padel available from Rakuten Kobo. Ecology, Economy is an elaborate argument to establish society as central in policy-making for holistic development. The... Ecology, Economy is an elaborate argument to establish society as central in policy-making for holistic development. The book presents cases of the adverse effects of resource utilisation—water, metals, power, land—on Adivasi communities in particular. India's economic policies need to be reviewed holistically in relation to their impacts on ecosystems and communities and to ensure long-term sustainability. The term "Development-Induced Displacement" adds insult to injury in a context where a majority of those displaced by industrial projects do not experience these as development at all, but experience a drastic drop in their living standards. What is indisputable is that this process is "Investment-Induced Displacement", since financial funding is the driving force that makes projects happen; and Adivasis themselves often say "We are being..." 2013.
