

BIBLIOGRAPHY
FOR PUBLIC RISK COMMUNICATION
ON WARNINGS FOR PUBLIC PROTECTIVE ACTIONS RESPONSE
AND PUBLIC EDUCATION*
(Revision 4)

Dennis S. Mileti
Rachel Bandy
Linda B. Bourque
Aaron Johnson
Megumi Kano
Lori Peek
Jeannette Sutton
Michele Wood

September 2006

*In addition to the work of the many people listed above who have contributed to this document, a variety of organizations have provided funds to support the work to develop this document and this support is gratefully acknowledged. These supporting organizations include Entergy Nuclear, the National Science Foundation, the U.S. Department of Homeland Security through the National Consortium for the Study of Terrorism and Responses to Terrorism (START Center) headquartered at the University of Maryland, and the U.S. Forest Service. However, only the authors are responsible for the interpretations and representations made in this bibliography.

SCImago Journal Rank (SJR): 1.141 ¹ SCImago Journal Rank (SJR): 2019: 1.141 SJR is a prestige metric based on the idea that not all citations are the same. SJR uses a similar algorithm as the Google page rank; it provides a quantitative and a qualitative measure of the journal's impact. View More on Journal Insights. Help expand a public dataset of research that support the SDGs. Gender Diversity distribution of the Editors ¹ Gender Diversity distribution of the Editors Data based on known, self-reported gender field options by the journal's editors (data from 18 Feb 2021). 12% woman. 88% man.

Evacuation_in_Cancun_During_Hurricane_Gilbert_1991 more. by Benigno Aguirre. Download (.pdf). Cancun_Under_Gilbert_1989 more. It is estimated that about 80% of all disasters are directly tied to weather events; thus forecasting weather has become a very important scientific, economic, and political endeavor. With the development of new and enhanced technology, weather forecasting skills have improved significantly both in the United States and internationally (National Research Council [NRC], 1999, 2003). However, weather forecasting is a probabilistic science and many uncertainties still remain (see National Science Foundation [NSF], 2002).
