I had taken a course about Mathematical Logic at National University of Singapore, in which the lecturer used this textbook: A Concise Introduction to Mathematical Logic, 3rd edition, by Wolfgang Rautenberg. Personally, I like both the textbook and the course a lot. The textbook initially appears to be quite difficult to read. However, once getting familiar with it, it is much easier to follow since the system of notation is very clear, the content is self-contained and the approach is by starting from foundation, no vague assumption.
