Oracle E-Business Suite, also known as Oracle Applications or Oracle EBS, is sophisticated software that works like a software system, which as a whole supplies the enterprise resource planning (ERP), customer relationship management (CRM), and supply chain planning application families. It is a software system that consists of global business applications with built-in integrity. After Oracle Financials, the product name changed to Oracle Applications; the next release was called Oracle Application Release 1, introduced in August 1987. Following Oracle Application Release 1, Oracle released its first ERP application called Accounting System in 1988; this application was considered Release 2. After that, the release numbers increased linearly. Interview Questions Oracle Financials - Part 1/2.
