Preservation maximizes the use of existing materials and infrastructure, reduces waste, and preserves the historic character of older towns and cities. The energy embedded in an existing building can be significant of the embedded energy of maintenance and operations for the entire life of the building. Sustainability begins with preservation. A recent report The Greenest Building: Quantifying the Value of Building Reuse (2011) delved into the question of how green an existing building truly is. The Preservation Green Lab, a part of the National Trust for
