Contemporary Strategy Analysis equips managers and students of management with the concepts, frameworks, and techniques needed to make better strategic decisions. My goal is a strategy text that reflects the dynamism and intellectual rigor of this fast-developing field of management and takes account of the strategy issues that companies face today. Contemporary Strategy Analysis endeavors to be both rigorous and relevant. While embodying the latest thinking in the strategy field, it aims to be accessible to students from different backgrounds and with varying levels of experience. The resulting first edition of Contemporary Strategy Analysis was grounded in the fundamental concepts and basic theories of strategic management and was strongly focused upon the determinants of profitability. However, the purpose was not to teach theory, but to use theory in order to provide answers to the strategic decisions that general managers face: What businesses should we be in? Most of the courses for which Contemporary Strategy Analysis is the core text use case studies as the principal teaching medium. The first edition of Contemporary Strategy Analysis was published in 1991. It was the outcome of three years of research at London Business School's Center for Business Strategy during which I immersed myself in the strategy literature, followed by teaching core strategy courses at the University of British Columbia. The new edition of Cases in Contemporary Strategy Analysis 2 comprises a range of case studies, most of which have been specially written to accompany the text and provide illumination and application of the concepts and frameworks it covers. Contemporary Strategy Analysis 9th edition solutions are available for this textbook. Publisher Description.
