Dictionary: in the case of the NP, is something of a nuisance. Entries have neither rhetorical marks nor boldface emphases, so saying something aloud requires the help of a French dictionary. The 2,000 or so entries in the NP comprise an encyclopedia, not a dictionary in the usual use of the term. Viewed as an encyclopedia, the NP is clearly the standard for books of this type. RED RIDING HOOD By James Marshall (Dial) Themes: Kindness/Fairy Tales Grade Level: K-2 Running Time: 8 minutes, animated SUMMARY RED RIDING HOOD is about a little girl, who sets out through the woods to deliver a basket of freshly made custard to her grandmother. Along the way Red Riding Hood meets up with a wicked wolf, who tricks her into believing he wants to escort her through the dangerous woods. The wolf suggests that Red Riding Hood pick some sunflowers for her granny, and runs ahead to Granny's house. The wolf gobbles up Granny and waits for Red Riding Hood. When Red Riding Hood arrives at Granny's house, the wolf gobbles her up too. The end of the story finds Granny and Red Riding Hood rescued from the stomach of the wicked wolf by a hunter. Red Riding Hood vows never to speak with strangers again-and she never does. REGULAR ARTICLE Forensic Psychiatry and the Internet: Practical Perspectives on Sexual Predators and Obsessional Harassers in Cyberspace Michael G. McGrath, MD, and Eoghan Casey, MA The growth of the Internet has revolutionized how society conducts business in many areas. Not to be left behind, the sexual predator and the obsessional harasser have found cyberspace to be a vehicle capable of meeting their needs: obtaining information, monitoring and contacting victims, developing fantasy, overcoming inhibitions, avoiding apprehension, and communicating with other offenders. Although clearly disparate offender categories, these two groups are included in this article because of the likelihood of their using the Internet in pursuit of their goals. Forensic psychiatrists should become familiar with computers and the Internet so that they can conduct relevant psychiatric evaluations of such individuals and can advise attorneys, victims, and law enforcement personnel competently, when retained in that capacity. This article discusses the Internet and its use by the sexual predator and the obsessional harasser, highlighting information of interest to the forensic psychiatrist, including the poorly understood field of digital evidence. Aspects of the Internet, such as on-line dating and cybersex also are covered, because they relate to sexual predation and stalking. # The Rise of the South African Reich

by Brian Bunting

## Preface

The *Rise of the South African Reich*, first published by Penguin Africa Library in 1964 and revised in 1969, analyses the period in which the political foundations of the apartheid regime were laid.

It traces the mobilisation of Nationalist Party power in the 1930s and 1940s around an ideology which had close affinities with that of Nazism. It documents the steps by which the Nationalist Party, having become the ruling party in 1948, consolidated its power: control of the trade unions, banning of mass political organisations, control of education and censorship of ideas, and the building of a massive armed machinery of repression.

After the writing of the book the apartheid regime shifted its social base, greatly expanded its repressive capacity and introduced new elements in its strategy for maintaining minority control. The political map of Southern Africa was redrawn by the advancing forces of liberation..

The book was written in the 1960s, a period which many observers labelled as one of 'political quiescence'. Bunting, however makes clear in his account of the regime's preparations for the defence of apartheid by military means, that the mass political mobilisation which later threatened the regime was built on an unbroken history of resistance.

Chief Inspector D. Baillie of the South African Police defended the members of his force against these allegations, but admitted that when he forced his way into Voortrekker Building, the O.B. headquarters, he had found the place filled with armed men from top to basement. 'There were weapons of every description - sticks, lead piping, batons, sjamboks, and so on.' While South Africa remained relatively unharmed by the Weltkrieg besides a short campaign into South West Africa and a short lived Maritz rebellion, winds of change arrived when Louis Botha, South Africa's first prime minister, died in office. Deputy prime minister Jan Christian Smuts then became the second Prime minister of the union, and, one month later, was forced to call for elections after a barrage of criticism from the Boer community. The election resulted in a hung parliament with the National Party winning the most seats. Smuts's South African Party then decided to form a coalition with The Rise of the South African Reich. Leibbrandt was a South African prizefighter who had once fought Max Schmeling in Hamburg and later came a fervent Nazi. He had joined the German army and was reported to have taken part in the invasion of Crete as a paratrooper.Â The Reich government regarded it as a matter of course that her former colonies would be returned to her without further ado - i.e. South Africa would have to give up the mandate over South-West Africa - but promised in return that the three British Protectorates of Swaziland, Bechuanaland, and Basutoland would be allocated to the Union government. Germany would not mind if South Africa extended her territory to include Southern Rhodesia and regarded South Africa as the 'leading white state in the South African living space '.
