ISBN 0-9663537-2-2

Cover designer: *CADCIM Technologies*

Copy editor: *Vivek Kumar*

Cover illustration: *Created by Deepak Maini and Puja Bahl Manchanda using Pro/ENGINEER and MAX software*

Technical editors: *Deepak Maini, Abhinav Rai, Gurpreet Singh*

Typeface: *10/12 New Baskerville Bt*

NOTICE TO THE READER

Publisher does not warrant or guarantee any of the products described in the text or perform any independent analysis in connection with any of the product information contained in the text. Publisher does not assume, and expressly disclaims, any obligation to obtain and include information other than that provided to it by the manufacturer.

The reader is expressly warned to consider and adopt all safety precautions that might be indicated by the activities herein and to avoid all potential hazards. By following the instructions contained herein, the reader willingly assumes all risks in connection with such instructions.

The Publisher makes no representation or warranties of any kind, including but not limited to, the warranties of fitness for particular purpose or merchantability, nor are any such representations implied with respect to the material set forth herein, and the publisher takes no responsibility with respect to such material. The publisher shall not be liable for any special, consequential, or exemplary damages resulting, in whole or part, from the reader's use of, or reliance upon, this material.

DEDICATION

*To teachers, who make it possible to disseminate knowledge
to enlighten the young and curious minds
of our future generations*

*To students, who are dedicated to learning new technologies
and making the world a better place to live*

THANKS

*To the faculty and students of the MET department of
Purdue University Calumet for their cooperation*

*To Deepak Maini, Abhinav Rai, Puja Manchanda, and
Gurpreet Singh of CADCIM Technologies for their valuable help*

Teaching Aids for Faculty

The following teaching aids are available to faculty:

1. All Part files (.prt), Assembly files (.asm), and Drawing files (.drw) used for tutorials and exercises in this book.
2. PowerPoint presentations for every chapter of the book.
3. Instructor's Guide with answers to review questions and solution to exercises.
4. Course outlines.
5. Students projects.
6. Free online technical support by contacting cadsoft@vsnl.com

To access the web site that contains these teaching aids, please contact the author, Prof. Sham Tickoo, at the following address:

stickoo@calumet.purdue.edu

or

tickoo@cadcim.com

Engineering Services Offered by CADCIM Technologies

The following are the services offered by CADCIM Technologies:

Solid Modeling, MAX/VIZ

CADCIM Technologies specializes and undertakes the following solid modeling related projects:

- Conversion of 2D drawings to 3D solid/surface models using Mechanical Desktop (MDT), Autodesk Inventor, Pro/ENGINEER, I-DEAS, CATIA, SolidWorks, and AutoCAD.
- Conversion of 3D models to 2D drawings.
- Conversion of raster drawings into vector drawings.
- Generation of assembly models.
- Animation and rendering using 3D Studio VIZ/MAX.
- Animation of assemblies using Autodesk Inventor and SolidWorks.

Training and Technical Documentation

CADCIM Technologies offer training on the following software packages:

- AutoCAD, • Mechanical Desktop (MDT), • Autodesk Inventor, • Pro/ENGINEER
- SolidWorks, and • 3D Studio VIZ/MAX.

CADCIM Technologies also offers services in developing technical documents, study/training materials, and brochures.

For more information, please visit www.cadcim.com

Table of Contents

Dedication	iii
Preface	xiii
Introduction	xv

Chapter 1: Creating Sketches in the Sketch Mode

The Sketch Mode	1-2
The Sketcher Environment	1-3
Creating a Sketch in the Sketch Mode	1-4
Drawing a sketch using the Mouse Sketch option	1-4
Drawing a Point	1-5
Drawing a Line	1-6
Drawing a Rectangle	1-10
Drawing an Arc	1-10
Drawing a Circle	1-13
Dimensioning the Sketch	1-15
Dimensioning the Sketch Using the Normal Option	1-16
Working with Constraints	1-16
Difference in working with and without the Intent Manager	1-18
Dimensioning the Basic Sketcher Entities	1-19
Dimensioning an Arc	1-19
Dimensioning Revolved Sections	1-19
Modifying a Sketch	1-20
Mod Entity Option	1-20
Modifying Dimensions when the Intent Manager is On	1-20
Regenerating a Sketch	1-22
Deleting Objects	1-22
Geom Tools	1-24
Trim	1-24
Mirror	1-26
GET SELECT submenu	1-27
Drawing Display Options	1-28
Tutorial 1	1-28
Tutorial 2	1-42
Tutorial 3	1-50
Self-Evaluation Test	1-57
Review Questions	1-57
Exercise 1	1-58
Exercise 2	1-58
Exercise 3	1-59
Exercise 4	1-59

Chapter 2: Editing in the Sketch Mode

Dimensioning the Sketch	2-2
Perimeter option	2-2
Reference option	2-3
Known option	2-4
Baseline option	2-4
Replace option	2-6
Autodimensioning in Pro/ENGINEER	2-6
Modifying a Sketch	2-6
Scale	2-6
Drag Dim Val	2-7
Drag Entity	2-8
Drag Vertex	2-8
Set Anchor	2-9
Geom Tools	2-9
Intersect	2-9
Divide, Move Entity	2-10
Sketching Advanced Geometry	2-12
Creating Conic Splines using the Conic option	2-13
Creating Coordinate System using the Coord Sys option	2-13
Creating Elliptical Fillet using the Elliptic Fillet option	2-14
Creating Splines using the Spline option	2-14
Creating Text using the Text option	2-16
Using the Blend Vertex option	2-17
Modifying Text	2-17
Sec Tools	2-17
Regeneration Failed	2-18
Resolve Sketch dialog box	2-19
Tutorial 1	2-20
Tutorial 2	2-24
Tutorial 3	2-28
Self-Evaluation test	2-32
Review Questions	2-33
Exercise 1	2-34
Exercise 2	2-34
Exercise 3	2-35

Chapter 3: Creating Base Features

Creating Base Features	3-2
Entering the Part mode	3-2
The Default Datum Planes	3-2
Creating a Protrusion	3-3
Extrude	3-3
Extrude > Thin	3-13
Revolve	3-14

Revolve > Thin	3-15
Parent Child Relationship	3-17
Implicit Relationship	3-18
Explicit Relationship	3-18
Tutorial 1	3-18
Tutorial 2	3-26
Tutorial 3	3-31
Tutorial 4	3-36
Self-Evaluation Test	3-42
Review Questions	3-42
Exercise 1	3-43
Exercise 2	3-44
Exercise 3	3-44
Exercise 4	3-44

Chapter 4: Datums

Datums	4-2
Default Datum Planes	4-2
Need for Datums in Modeling	4-2
Datum Options	4-3
Datum Planes	4-4
Datum Planes created “On The Fly”	4-11
Datum Axes	4-11
Datum Points	4-14
Creating Cuts	4-19
Tutorial 1	4-21
Tutorial 2	4-33
Tutorial 3	4-42
Self-Evaluation Test	4-50
Review Questions	4-51
Exercise 1	4-52
Exercise 2	4-53
Exercise 3	4-54
Exercise 4	4-55
Exercise 5	4-56

Chapter 5: Options Aiding Construction of Parts-I

Options Aiding the Construction of Parts	5-2
The HOLE dialog box	5-2
Rounds	5-8
Chamfers	5-11
Ribs	5-12
Editing the Features of a Model	5-13
Redefining Features	5-13
Reordering	5-15

Rerouting	5-16
Suppressing	5-16
Deleting a feature	5-16
Modifying a feature	5-17
Tutorial 1	5-18
Tutorial 2	5-28
Tutorial 3	5-34
Self-Evaluation Test	5-40
Review Questions	5-41
Exercise 1	5-42
Exercise 2	5-42

Chapter 6: Options Aiding Construction of Parts-II

Pattern	6-2
Uses of Patterns	6-2
Pattern Types	6-2
Pattern Options	6-3
Deleting a Pattern	6-5
Copy	6-6
Mirroring a Geometry	6-8
Tutorial 1	6-9
Tutorial 2	6-15
Tutorial 3	6-27
Self-Evaluation Test	6-34
Review Questions	6-34
Exercise 1	6-35
Exercise 2	6-37
Exercise 3	6-37
Exercise 4	6-38

Chapter 7: Advanced Modeling Tools-I

Other Protrusion Options	7-2
Sweep	7-2
Sweep > Thin	7-7
Sweep Cut	7-7
Blend	7-8
Parallel	7-8
Rotational	7-10
General	7-11
Using Blend Vertex	7-11
Shell Option	7-12
Datum Curves	7-13
Tutorial 1	7-15
Tutorial 2	7-22
Tutorial 3	7-27

Tutorial 4	7-33
Self-Evaluation Test	7-38
Review Questions	7-39
Exercise 1	7-40
Exercise 2	7-40
Exercise 3	7-41
Exercise 4	7-42

Chapter 8: Advanced Modeling Tools-II

Advanced Feature Option	8-2
Var Sec Swp Option	8-2
Swept Blend	8-4
Helical Sweep	8-6
Sect to Srf or Blend Section to Surfaces	8-7
Srf to Srf or Blend Between Surfaces	8-7
From File	8-9
Using Relations	8-9
Equality Relations	8-9
Comparison Relations	8-10
Tutorial 1	8-12
Tutorial 2	8-19
Tutorial 3	8-31
Tutorial 4	8-40
Self-Evaluation Test	8-43
Review Questions	8-43
Exercise 1	8-44

Chapter 9: Assembly Modeling

Assembly Modeling	9-2
Placement Constraints	9-3
Assembly Datum Planes	9-7
Assembling the Components	9-7
Packaging the Components	9-12
Creating Simplified Representations	9-13
Master Representation	9-13
Graphics Representation	9-14
Geometry Representation	9-15
Redefining the Components of the Assembly	9-15
Reordering the Components	9-15
Suppressing/Resuming the Components	9-16
Replacing Components	9-16
Assembling Repeated Copies of a Component	9-16
Modifying the Components of the Assembly	9-17
Creating the Exploded State	9-18
Creating the Offset Lines	9-20

The Bill Of Material	9-21
Tutorial 1	9-23
Tutorial 2	9-40
Self-Evaluation Test	9-51
Review Questions	9-52
Exercise 1	9-53

Chapter 10: Generating, Editing, and Modifying the Drawing Views

The Drawing Mode	10-2
Generating the Drawing Views	10-5
Sectional Views	10-8
Creating the Section Planes	10-12
Perspective Views	10-13
Editing the Drawing Views	10-14
Modifying the Drawing Views	10-15
Modifying Other Parameters	10-17
Tutorial 1	10-17
Tutorial 2	10-26
Self-Evaluation Test	10-34
Review Questions	10-34
Exercise 1	10-35

Chapter 11: Dimensioning the Drawing Views

Dimensioning the Drawing Views	11-2
Show / Erase dialog box options	11-2
Modifying and Editing the dimensions	11-5
Modifying the Dimensions using the Dimension Properties dialog box	11-6
Modifying the Dimensions using the Shortcut Menu	11-10
Cleaning up the Dimensions	11-10
Adding Reference Datums to the Drawing Views	11-12
Adding tolerances in the Drawing Views	11-14
Editing the Geometric Tolerances	11-18
Adding Notes to the Drawing	11-19
Adding Balloons to the Assembly Views	11-20
Tutorial 1	11-20
Tutorial 2	11-27
Self-Evaluation Test	11-32
Review Questions	11-33
Exercise 1	11-34

Chapter 12: Other Drawing Options

Sketching in the Drawing Mode	12-2
Modifying the Sketched Entities	12-3
User-Defined Drawing Formats	12-5

Retrieving the User-Defined Formats in the Drawings	12-6
Adding and Removing Sheets in the Drawing	12-6
Creating Tables	12-7
Using the Assembly Bill Of Material in the Drawings	12-10
Tutorial 1	12-10
Tutorial 2	12-18
Self-Evaluation Test	12-27
Review Questions	12-28
Exercise 1	12-29

Chapter 13: Projects

Tutorial 1	13-2
Project 1	13-31
Project 2	13-40

Appendices

Appendix-A: Interface	A-1
Appendix-B: Sketches	B-1

Author's Web Sites

For Faculty: Please contact the author at stickoo@calumet.purdue.edu or tickoo@cadcim.com to access the web site that contain the PowerPoint presentations, solid models used in the text book, Instructor's Guide, and other related material.

For Students: You can download solid modeling exercises, tutorials, and special topics by accessing the author's web site at <http://www.calumet.purdue.edu/public/mets/tickoo/index.htm>

Preface

PRO/ENGINEER 2001

Pro/ENGINEER, developed by Parametric Technology Corporation, is one of the world's fastest growing solid modeling softwares. It is a parametric feature-based solid modeling tool and it not only unites the 3D parametric features with 2D tools but also addresses every design-through-manufacturing process. Based mainly on the solid modeling users feedback, this solid modeling tool is remarkably user-friendly and it allows you to be productive from day one.

This solid modeling tool allows you to easily import the standard format files with an amazing compatibility.

The 2D drawing views of the components are automatically generated in the Drawing mode. The drawing views that can be generated include detailed, orthographic, isometric, auxiliary, section, and so on. You can use any predefined drawing standard files for generating the drawing views. You can display the model dimensions in the drawing views or add reference dimensions whenever you want. The bidirectional associative nature of this software ensures that any modification made in the model is automatically reflected in the drawing views and any modification made in the dimensions in drawing views automatically updates the model.

Pro/ENGINEER for Designers is a book that is written with an intent of helping the people who are into 3D design. This book is written with the tutorial point of view with learn-by-doing as the theme. The mechanical engineering industry examples and tutorials are used in this book to ensure that the user can relate his knowledge of this book with the actual mechanical industry designs. The main features of the book are as follows:

- **Tutorial approach.**

The author has adopted the tutorial point-of-view with learn-by-doing as the theme throughout the book. This approach will guide the users through the process of creating the model in the tutorial.

- **Real-World Projects as Tutorials.**

The author has used the real-world mechanical engineering projects as tutorials in this book so that the reader can correlate the tutorials in this book with the real-time models in the mechanical engineering industry.

- **Tips and Notes.**

The additional information related to the topics is provided to the users in the form of tips and notes.

- **Learning Objectives.**

The first page of every chapter provides in brief the topics that will be covered in that chapter. This will help the users to easily refer to a topic.

- **Tools section.**

Every chapter begins with the tools section that provides the detailed explanation of the Pro/ENGINEER tools.

- **Self-Evaluation Test, Review Questions, and Exercises.**

Every chapter ends with a Self-Evaluation Test so that the users can assess their knowledge of the chapter. The author has given the answers of the Self-Evaluation Tests so that the users can compare their answers with the correct answers. The Review Questions and Exercises are also given at the end of each chapter and can be used by the Instructors as test questions and exercises in the classroom.

- **Heavily illustrated text.**

The text in this book is heavily illustrated with the help of around 500 line diagrams and 700 photos that support the tools section and tutorials.

A Design Engineer, or Product Engineer, is responsible for turning ideas for products into functional prototypes using efficient and affordable processes. Their duties include preparing design briefs that serve a particular purpose, researching possible production methods and use engineering software to refine and develop their product. What does a Design Engineer do? Design Engineers often work in the manufacturing field or as part of a consulting firm to provide companies with a model for producing various tools and consumer goods. They consider all aspects of a product's use including visual appeal, safety, accessibility and affordability. They collect feedback on user responses to prototypes and use it to make adjustments and improve the product's overall appeal. Hire the best Professional Engineers Upwork is how. Upwork has the largest pool of proven, remote Professional Engineers. Don't believe us? Check out some of our top rated Professional Engineers below. Get Started. Clients rate Professional Engineers 4.8 / 5. based on 571 clients reviews. I am Pro Tools certified user, and I can provide polished, professional sounding audio with a quick turn around. See More. See more. Experienced Graphic Designer and Social Media Consultant with a demonstrated history of working in the graphic design industry. Skilled in Adobe After Effects, Trapcode Particular, Adobe Photoshop, and Adobe Illustrator. Strong entrepreneurship professional with a Bachelor of Science and Communication focused in Integrated Media from Ohio University. Browse 5,512 PRO ENGINEER DESIGNER Jobs (\$52K-\$107K) hiring now from companies with openings. Find your next job near you & 1-Click Apply! All Titles Mechanical Designer (120) CAD Designer (104) Mechanical Engineer (56) User Experience Designer - Oracle Cloud Infrastructure (OCI) (50) Software Development Engineer in Test (SDET Android) (47) Director of Data Center Infrastructure Software Tools (JoinOCI-Leader) (47) Site Reliability Developer 3 (47) DevOps - Logging Monitoring - Cloud Development (47) Senior Android Software Engineer (41) IT Software Developer (28) Senior Mechanical Engineer (25) Design Engineer. Product designers and engineers will be more productive, enabling better data sharing and design reviews with customers and suppliers, and preventing unforeseen service and manufacturing issues. Pro/ENGINEER, CoCreate and ProductView provide the foundational elements of the Creo vision, delivering proven performance in 2D and 3D CAD, CAE, CAM, CAID and visualization. Creo not only protects your existing investment in these products, but provides a smooth path to the future. PTC Creo New vision. Same path to success. Pro-ENGINEER | CoCreate | ProductView. Product Mapping for Creo and Pro/ENGINEER... Pro/ENGINEER Routed Systems Solutions Pro/ENGINEER Routed Systems Solutions offer Helps designers and engineers create complex interconnected routed system diagrams more quickly and easily, as an integrated part of the total product development process. It allows the creation of wiring, P&ID, block and schematic diagrams. It is a standalone package, but because it is an integrated part of Pro/ENGINEER, allows the reuse of diagrams to drive 3D cabling and piping routing using the Pro/ENGINEER Piping Design and Cabling Design. Pro/ENGINEER Routed Systems Designer An easy-to-use, standalone, mult
