As Arthur Bochner (1989, p. 336) points out, though, that definition can be made more specific. In an interpersonal episode, then, each communicator is both a knower and an object of knowledge, a tactician and a target of another's tactics, an attributer and an object of attribution, a codifier and a code to be deciphered. Interpersonal communication is an exchange of information between two or more people. It is also an area of research that seeks to understand how humans use verbal and nonverbal cues to accomplish a number of personal and relational goals. Interpersonal communication research addresses at least six categories of inquiry: 1) how humans adjust and adapt their verbal communication and nonverbal communication during face-to-face communication; 2) how messages are produced; 3) how uncertainty influences interpersonal communication in the workplace plays an important role in employee satisfaction, motivation, collaboration and business success. In this blog, we will go over the definition and importance of interpersonal communication in the workplace. Download our eBook "10 Principles of Modern Employee Communications" and learn how to communicate with the modern employee in today's digital age. What Is Interpersonal Communication? Interpersonal communication is an exchange of information between two or more people.[1] It is also an area of study and research that seeks to understand how humans use verbal and nonverbal cues to accomplish a number of personal and relational goals.[1] Generally, interpersonal communication research has contributed to at least six distinct categories of inquiry: 1) how humans adjust and adapt. Interpersonal communication can take place in face-to-face settings, as well as through
